SpeedTube®

INCREASE PLANTER PRODUCTIVITY BY UP TO 50%

MEET YOUR PLANTING WINDOW CHALLENGES HEAD ON.

We've all been there. Weather and planting conditions are ideal, but you're limited in your planting capacity because the mechanical capabilities of your current planter limit the speed at which you can plant without compromising performance.

Today's seed tubes struggle to maintain good seed spacing performance for two reasons:

1. As the row unit and meter bounce, seeds drop at different speeds, changing the spacing between them.
2. As planting speeds increase, seeds increasingly bounce and roll in the trench.

SPEEDTUBE GIVES YOU A BETTER WAY.

Replace your existing seed tube with SpeedTube. It utilizes two feeder wheels to grab the seed off the vSet® disk and place it into a belt that controls the seed all the way into the trench. The independent electric drive within SpeedTube matches the ground speed of the planter, enabling an ideal drop of the seed into the trench.

IMPROVE YOUR PLANTER PERFORMANCE WHILE MAKING YOUR PLANTER SIMPLER.

Grab that seed

Feeder wheels grab the seed off the disc and place it onto the belt for delivery to the trench while maintaining superior singulation and spacing.

Control Its Descent

The belt matches the speed of the planter and carries the seed all the way to the bottom of the trench

Release without Roll

The seed drops exactly where it needs to be as SpeedTube eliminates seed roll and bounce.
